

The Gamma is a distinct and sexy fabric structure that appears curvy and voluptuous despite its flat form. Great in pairs flanking entryways, or when forming an organic heart-like shape, the Gamma can free-stand when placed upright on a pipe and base.

The Gammas are constructed with distinct right and left sides that create bookends for a doorway, stage sets or exhibit booths. Easy to assemble—just place the correct amount of rods in the fabric tube.

Pink Inc's Gammas form an eye-catching backdrop for Hillary Clinton at a National Association of Women Business Owners conference.

Pink Inc.'s Gamma forms are reminiscent of flowers, leaves and hearts. These forms are commonly placed in pairs or groupings with Gammas or other fabric structures
