

These temporary walls act as room dividers, entranceways and stage backdrops for meetings, displays, visual merchandising, tradeshow booths and displays. Shown here is a printed, lighted stage set for the Event Design Summit at the Hollywood and Highland Center, Hollywood, CA.

Part of a larger stage set design, the Large Slope is joined by a Small Slope at this event. Easy and elegant, the walls are available for rent, which means that you can get a custom look at a fraction of the price.

Three tension fabric walls act as lighted surfaces that artfully divide up a trade show space. Freestanding fabric walls are an alternative to pipe and drape installs. For this show we created layers for depth, using Large Slope and portable curved Wave Walls and LED lighting.
