

The Slender Slope is a curved wall that slopes from 8' down to 6.' At 4' wide, this diminutive fabric wall is the thinnest in the Wave Wall Collection. At the Event Design Summit a unique alternate to printing was developed – an added fabric “x” that fit the brand image for this conference.

In pairs the Slender Slopes become freestanding storage space on the trade show floor or office environment. They are excellent for fitting around and disguising columns and because they are lightweight, they are easily changed, moved and reconfigured.

Colorful fabric covers the pre-bent aluminum frame of the Slender Slope. The snap together frame is easily erected and pillow-cased in fabric. Used here at a trade show, this curved wall divides and defines space in an attractive way.

Combining several different walls from the Wave Wall Collection creates an interesting landscape for dividing and defining space. The Slender Slopes are available through the Streamline Rental Program in white fabric, which allows you to change the color with light.
