Zip-Ties
Sewing Kit
Tie Line
Shears or Diagonal Cutters

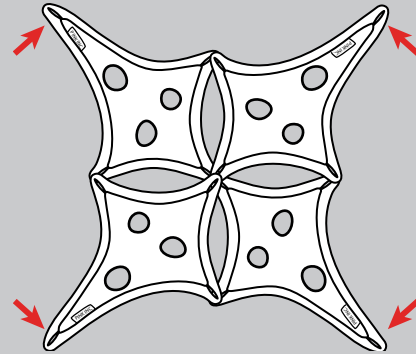

Additional Support Please Call:
212-253-6666 or
After Hours: 646-853-3900

1. Before handling the fabric, wash hands and lay out the drop cloth in work area. Be sure to have an ample work area: when fully stretched, the Comet reaches 40' between opposite points.

2. The Comet has a "true" front and back and is made up of 4 attached Nebulas. The back has visible seams and tags. Please note the loose ends, which will be used for rigging.

3. To rig with zip-ties or quick links: Determine rigging points and move onto step 4.

To rig with tie line: Determine rigging points and an approximate length for the line. Attach the lines to the loops using zip-ties.

4. Secure the first loop to one of the rigging points using the chosen rigging method.

5. Locate the loop opposite of the secured point and stretch away from it. Attach this before moving on to the other points. This establishes the correct tension.

6. Attach the remaining points. Tidy up any excess tie line if it was used.

Trouble Shooting:

- If wrinkles are present:
 - * Stretch further to increase tension;
 - * Be sure opposite points are stretched along the same plane.
