

PINK PROVIDES:

- 1 Set of Medium Cove Metals
- 1 Medium Cove Fabric
- Extra Pop Buttons

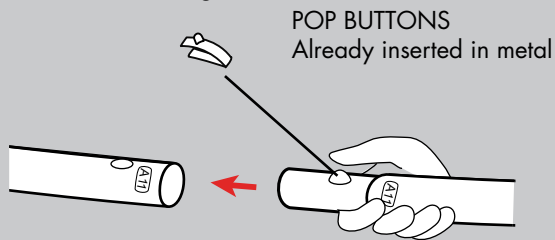

YOU PROVIDE:

- Site Plan/Event Layout
- Four Person Team
- Plastic Drop Cloth
- Gloves
- Sewing Kit
- 100 lbs of Sandbags

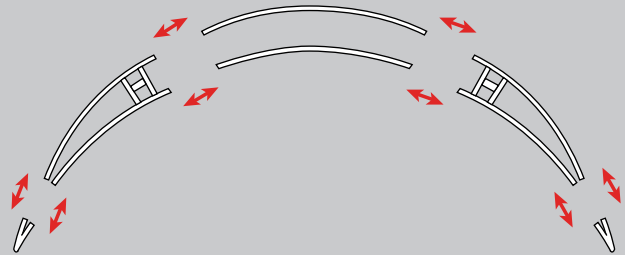

Additional Support Please Call:
212-253-6666 or
After Hours: 646-853-3900

Metals are labeled for easy assembly. Simply match the corresponding parts, depress the button, and slide together.

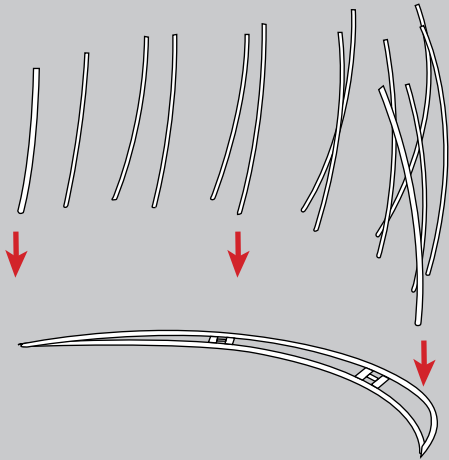

1. Join the metal pieces that create the base for the Medium Cove.

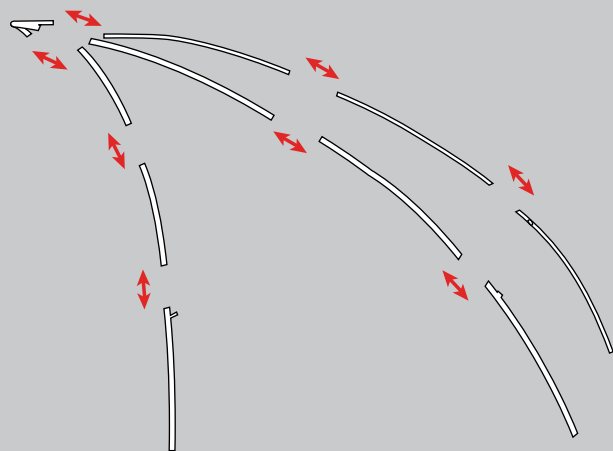

Prior to assembly, lay out drop cloth in designated work location. Before working with fabric, wash hands or put on gloves.

2. To the base, attach the bottom-most parts of the vertical metals. This is the bottom half of the Cove. Set it aside for now.

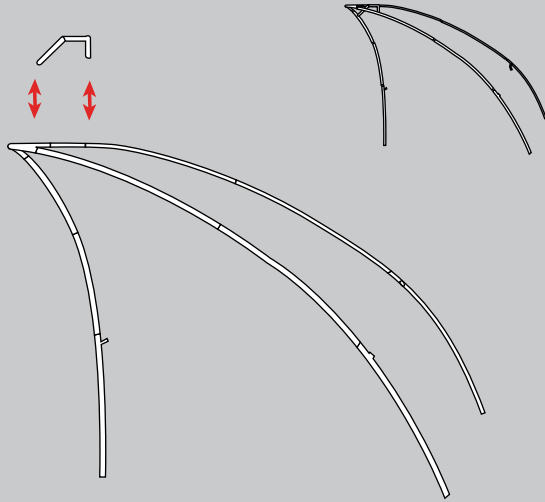

3. Assemble the three pieces that make the side and central "ribs" of the Cove and attach them to the tip of the Cove.

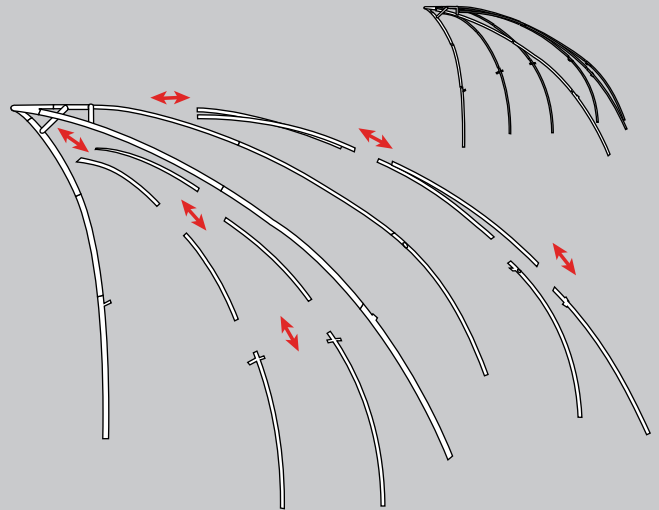

Any and all rights (including, without limitation, copyright, design patent, use patent and trademark) in and to all designs, concepts, renderings, or graphics (collectively, "Design") represented in this document were created by Moss Inc. and remain the sole and exclusive property of Moss Inc. Use of any such Design by the recipient without required purchase is strictly prohibited. ©2010

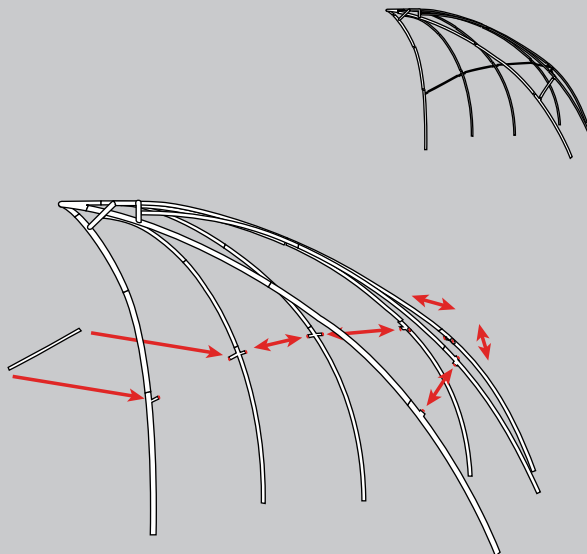

4. Attach the small three-sided metal pieces.

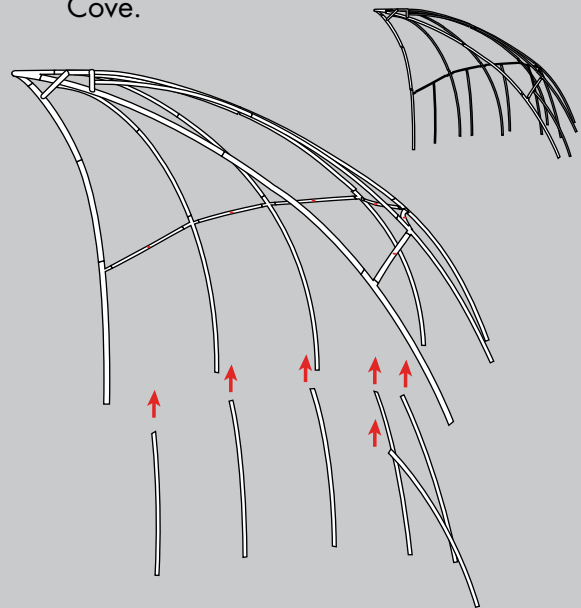

5. Assemble the four other central "ribs" of the top part of the Cove and attach them to the piece from step 4.

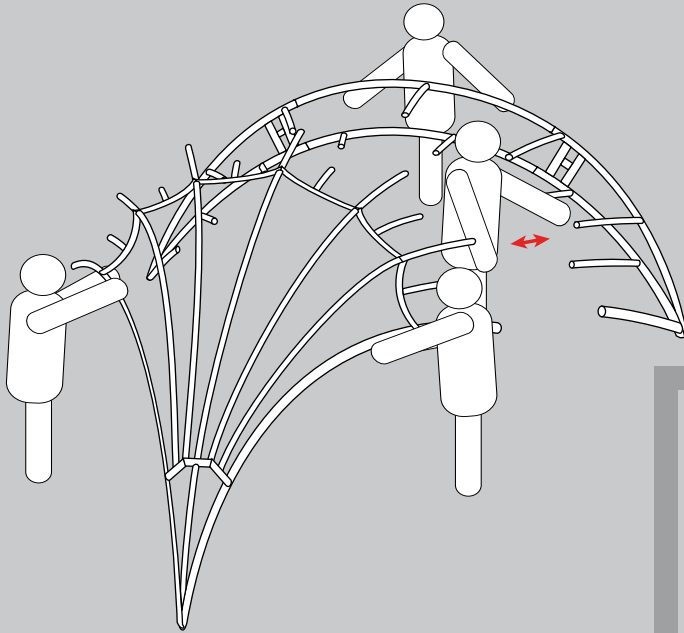

6. Join the "ribs" at the joints with the small metal pieces.

7. Attach the remaining metals to the middle of the small pieces used in step 6. You now have completed the top half of the Cove.

Use of any such Design by the recipient without required purchase is strictly prohibited. ©2010

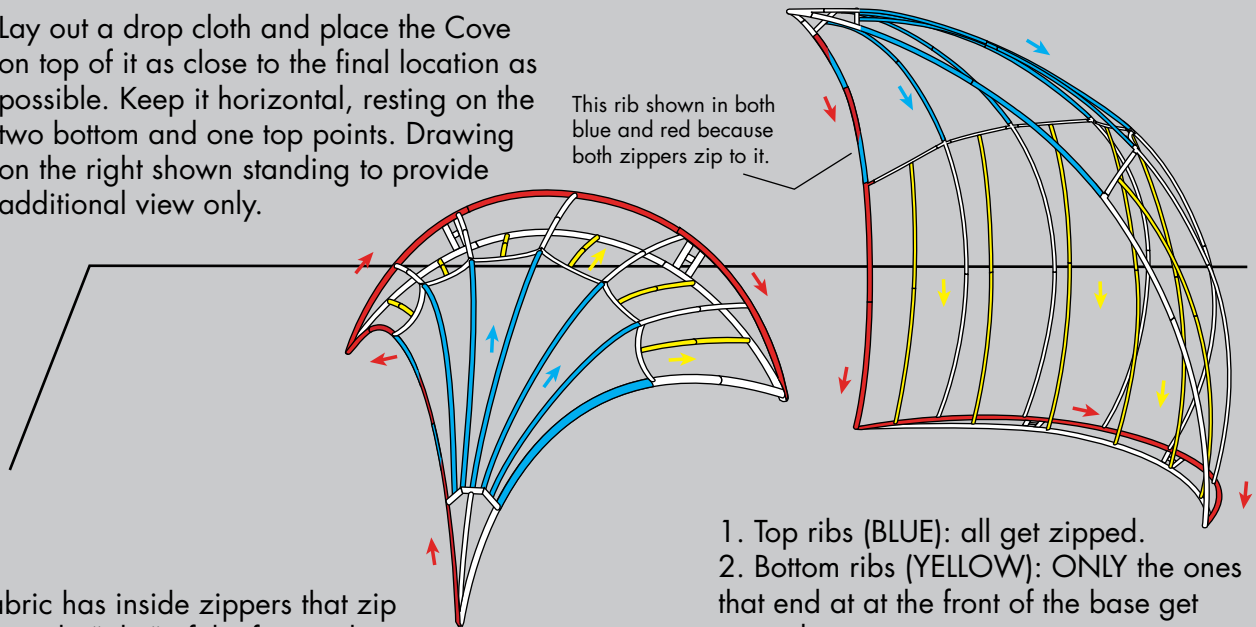

8. You need four people to put the two sections together. Lay the two sections horizontally. Have two people lift the top section so only the top point touches the ground. Have one person tilt the bottom section up so it only rests on the two bottom corner points. The fourth person should then pop the metals of each section together.

9. PLEASE NOTE: You MUST slide the tip of the fabric over the top point of the frame before zipping the fabric to the metals. Read next step but do not zip anything until the tip of the fabric is on.

10. Lay out a drop cloth and place the Cove on top of it as close to the final location as possible. Keep it horizontal, resting on the two bottom and one top points. Drawing on the right shown standing to provide additional view only.

This rib shown in both blue and red because both zippers zip to it.

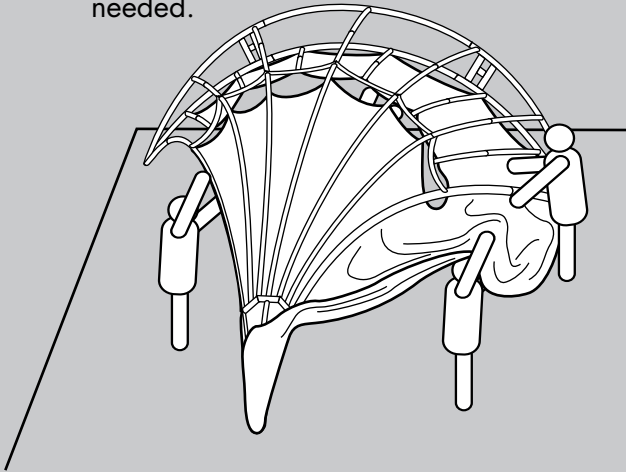

The fabric has inside zippers that zip to the inside "ribs" of the frame; then it wraps around the back and zips around the side and bottom of the whole frame. Zip in the order listed to the right:

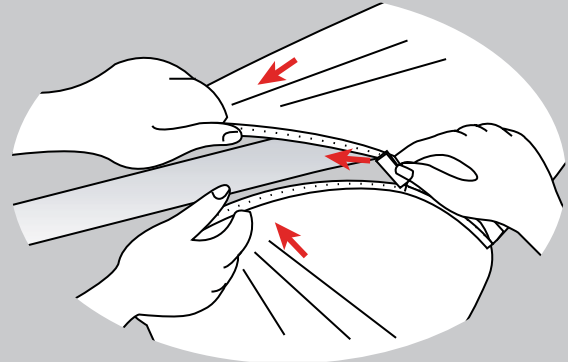

1. Top ribs (BLUE): all get zipped.
 2. Bottom ribs (YELLOW): ONLY the ones that end at at the front of the base get zipped.
 3. Final zipper (RED): runs from top point down, then around the back of the base.
- NOTE: Fabric not shown in drawings.

11. Slide the tip point onto the tip of the frame and zip the fabric to the "ribs." Have one person inside the frame zipping, one person outside holding the remaining fabric, and two people lifting the frame as needed.

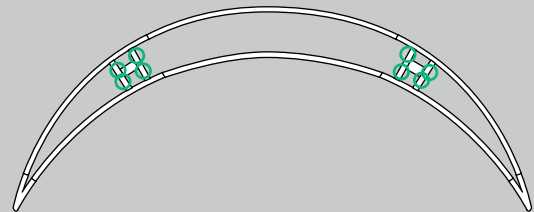

12. After zipping all the "ribs," wrap the fabric around the back and zip it closed down the side and across the bottom. Have one person pull the fabric over the metal while another one zips. The fabric is strong, so we encourage pulling hard!

13. To stand the Cove, have two people hold the base points in place while a third lifts the top point up and then walk forward to tilt the Cove to upright position. If needed, have the fourth person help the third.

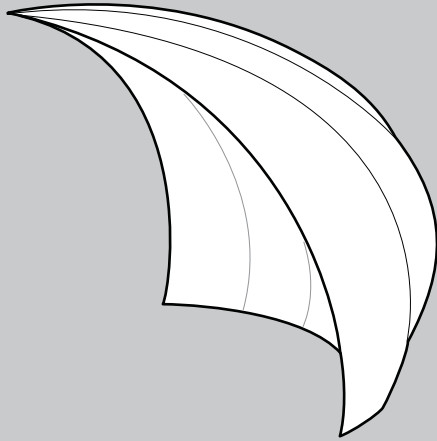

14. Have two people support the Cove while a the other two unzip the bottom and place sandbags/weights inside. Make sure the weights sit on the actual metals. Zip the bottom closed when done.

Approximate
sandbag placement

Use of any such Design by the recipient without required purchase is strictly prohibited. ©2010

15. The Cove is now complete.

Final Note:

Metals:

After use, dismantle. Each metal is labeled; place back in the corresponding labeled bag. If possible, zip-tie pieces together.

Under NO circumstances should the metals be taped to one another.

Fabric:

Each fabric is labeled on the Pink Inc. tag and should be placed back in the corresponding labeled bag.
