PRODUCTION AND STAGING

Pink Inc. works with theatrical producers, event designers and producers and AV companies and departments in a variety of venues to create tension fabric backdrops, scenery, and stage sets for events, conferences, television and theater.

LIGHTING: Lighting designers love working with tension fabric: lighting transforms translucent fabric, and images printed on the fabric pop when lit. Energy-efficient low-heat LED's create stunning effects; gobos are clear and sharp.

PRODUCTION: Fabric is an excellent surface for projection, front-screen or rear screen. The results are almost as sharp as a traditional projection screen, but without the hassle. Stretch fabric folds up small, but tensions out large without wrinkles—no ironing or steaming necessary.

STAGE SETS: Scenic companies use Pink Inc. fabric architecture to transform simple stages into dramatic and memorable sets and backdrops for presentations, dinner events, award ceremonies or concerts. Hang Kites or Diamonds; use Wave Walls or Moons as screens or set elements.

CORPORATE THEATER: PINK's fabric structures add pizzazz to corporate meetings and events. Rearrange the stage from lunch to dinner with lightweight easy-to-move fabric structures. And "Art in Motion" sculptural costumes are a fresh way to introduce new staff or products.

DJ/VJ: Music and video producers choose tension fabric for truss covers, projection screens, green screen, free-standing walls or rigged screens, as well as front boards.
