Zip-Ties
Sewing Kit
Tie Line
Shears or Diagonal Cutters

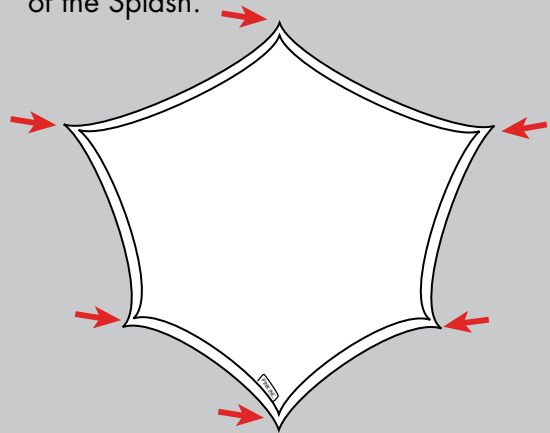

Additional Support Please Call:
212-253-6666 or
After Hours: 646-853-3900

1. Before handling the fabric, wash hands and layout the drop cloth in work area. Be sure to have an ample work area - when fully stretched, the Splash reaches 10' x 10' at extents.

2. The Splash has a "true" front and back. The back has visible seams and a tag. Also please not the loops located at the 6 points of the Splash.

3. To rig with zip-ties or quick links: Determine rigging points and move onto step 4.

To rig with tie line: Determine rigging points and an approximate length for the line. Attach the lines to the loops using zip-ties.

4. Secure the first loop to one of the rigging points using the chosen rigging method.

5. Locate the bottom loop, opposite of the secured point. Stretch 10' away from the first secured loop. Attach it before moving on to the other points. This establishes the correct tension.

6. Attach the remaining top points, followed by the last two bottom points. Tidy up any excess tie line if it was used.

Trouble Shooting:

- If wrinkles are present:
 - * Stretch further to increase tension;
 - * Be sure opposite points are stretched along the same plane.
- If there are no rigging points for bottom loops:
 - * Use sandbags with tie line to weigh these points down.
